RAMSEY MEDICAL INC

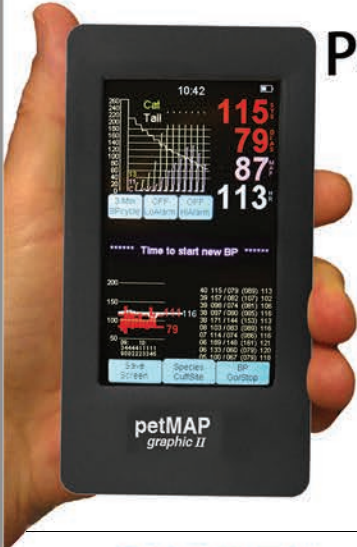

petMAPs are small, lightweight and portable devices designed for veterinary use. These devices conveniently display and track measured values both visually and numerically on their screens. Additionally, the data and screen images can be optionally saved on an SD memory card through the integrated SD memory card slot of the devices.

Veterinary professionals interact with the petMAPs through their touch screens, similar to a smartphone. Users have the ability to set alarms, reinflate intervals, and timers as needed.
